## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Allison et al (5,59,110).

Allison et al teach an apparatus for forming concrete blocks, comprising a mold box (100), an underlying pallet table (78) for supporting a pallet (80), a frame (20) supporting a drive member (124), which connects to the mold box and the pallet table; and means (130, 135, 142, 144, 74, 76) for causing the individual reciprocating movement of the mold box and the pallet table.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Braungardt et al (5,846,576).

Braungardt et al teach an apparatus for the production of shaped bricks, comprising a mold box (3), and an underlying pallet table (1) for supporting a pallet (26), a frame (18) supporting a drive member (20), which connected to the mold box (3) and the pallet table (1) and constituting means for individually moving the mold box and the pallet table toward and away from each other (col. 4, lines 16-24).

Art Unit: 1722

## Allowable Subject Matter

- 4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach or suggest that the drive member includes a drive shaft and first and second connectors; in which the first connector extending between the drive shaft and the mold box; the second connector extending between the drive shaft and the pallet table; wherein the drive shaft including a first eccentric means engaged to the first connector, and a second eccentric means engaged to the second connector.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thu Khanh T. Nguyen whose telephone number is 703-305-7167. The examiner can normally be reached on Monday- Friday, 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L Walker can be reached on 703-308-0457. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
